

Computerworld Top 200 2018

SER Group leads the Polish ECM market

(July 11, 2018 – Berlin/ Warsaw) Once again, Computerworld Top 200* ranks SER number one in the ECM market in Poland. The magazine *Computerworld* publishes the ranking in cooperation with IDG under the patronage of the Polish Ministry of Digital Affairs, the Ministry of Entrepreneurship and Technology, and the National Center of Research and Development. *Computerworld*, Poland's top technology publication, analyzes the economic impact and market strengths of IT vendors in the Polish market. It ranked about 400 companies in 60 sub-rankings for 2018. SER already clinched first place in the ECM ranking last year, when it was first introduced.

In addition to its top position in the ECM ranking, SER also achieved leading positions in several other rankings. SER is ranked third among the “Largest solution and IT service providers in the finance and insurance sector 2017”. Furthermore, it reached the top ten among the “Largest solution and IT providers in construction and manufacturing 2017”, the “Largest solution and IT providers in the education sector 2017”, the “Largest solution and IT providers in healthcare 2017”, and the “Largest solutions and IT services providers for enterprise and large corporations”. Moreover, SER is eighth among the “Largest software providers with their own licenses in 2017”.

Overall, SER ranks 50th among the 400 analyzed companies in the ranking of the biggest IT companies in Poland. This, combined with SER's leading position in the ECM ranking and the strong positioning in 20 of the Computerworld's Top 200 other sub-rankings, underline SER's strong market position in Poland and stresses its power in Europe.

“We are delighted that we are not only recognized by international market analysts for our strength and market presence, but also – and equally important – we are recognized in the local markets and set a high benchmark there,” says Morad Rhlid, Managing Director at SER Solutions International.

“Computerworld's Top 200 sets the tone in the Polish IT market. Being recognized as the leader in ECM shows that our Doxis4 iECM platform is meeting market needs. Its flexibility, scalability and user-friendliness set us apart from the competition. The feedback from the market is positive and substantiated by the repeated recognition from leading industry publications,” adds Marcin Somla, Director at SER Solutions Polka.

SER's Doxis4 software platform also fulfills the highest requirements and brings together ECM, BPM, collaboration and EFSS onto one uniform technological platform. The flexibly deployable Doxis4 business templates handle areas such as contract management, QM management and invoice management, plus industry-specific solutions such as machinery and product life-cycle records.
