New legal entity and growing partner network

SER Group strengthens business in Russia

Berlin/Moscow, October 20, 2016 – The SER Group, one of the top ECM vendors worldwide, is expanding its business in Russia with a newly founded legal entity OOO SER Software RUS. With this step, SER is strengthening its commitment to the Russian market. Supported by a growing partner network of companies such as Masterdata and Softline, SER plans to bolster its local team with in-house developers.

“We see great potential in the Russian IT market. Our new legal entity emphasizes this. We aim at becoming a fully integrated market player and a reliable partner for companies in Russia, helping them to more efficiently handle their content and processes in a compliant and secure way,” says Morad Rhlid, Managing Director of SER Solutions International. Today, many of SER’s international customers are already operating in Russia. As an experienced partner, SER localizes its Doxis4 suite for enterprise content management and business process management to the needs of its Russian customers and to the regional situation.

Apart from its new legal entity in Russia, SER is also in the process of obtaining certification from the Federal Service for Technical and Export Control (FSTEC) of Russia for adhering to regulatory laws for technology and exports. Under Rhlid’s leadership, SER’s international business has grown significantly, leaving a strong footprint in each market in which SER is active.

About the SER Group

SER connects people, products and processes in the most efficient way possible to create the digital workspace of the future. With our leading Doxis4 iECM suite we have been setting new standards in the development of enterprise content management software (ECM) for the past 30 years. More than one million satisfied users worldwide rely on our user-friendly solution to increase their return on information. The unified platform for ECM and BPM (business process management) seamlessly integrates content and processes to the benefit of its users. ECM Excellence by SER unites vision, inspiration, experience, awareness and the expertise of our team of over 550 employees.
